

Wait for a
broadcast packet

```
graph TD; A([Wait for a broadcast packet]) --> B([Observe the game pad]); B --> C([Send current game pad status]); C -- "In 10 ms period" --> B;
```

The flowchart consists of three yellow rounded rectangular boxes with red borders. The first box at the top contains the text 'Wait for a broadcast packet'. A red arrow points down from this box to the second box, which contains 'Observe the game pad'. From the second box, a red arrow points down to the third box, which contains 'Send current game pad status'. A red arrow then loops from the right side of the third box back to the right side of the second box. This loop arrow is labeled 'In 10 ms period'.

Observe the
game pad

In 10 ms period

Send current
game pad status
